

DE SANGOSSE

Spray Enhancers

Blue Marker Dye

What is it?

A soluble liquid, highly concentrated, non-permanent blue dye.

Formulation

A soluble liquid concentrate.

Main Recommendations

The rate will be within the range of 50-200 ml per 100 litres. The rate will vary depending on target colour, height and spray application rate. For knapsack application use up to 40 ml per 5 litres (operators may need to adjust rates from those suggested to achieve desired degree of marking). Do not let the dye drift and avoid "off-target" spotting.

Rate of Use

50-200 ml per 100 litres

Water Volume

As per partner pesticide.

Pack Size

1 litre
